Laboratory Services

Includes lab draws and routine diagnostic sampling.

HOME REHABILITATION

Home Rehabilitation Services

Our skilled physical, occupational, and speech therapists provide personalized care to help patients regain strength, mobility, communication, and independence in the comfort of their homes. Services are based on medical necessity and physician orders.

Physical Therapy (PT)

Improves strength, balance, mobility, and joint function while promoting safe movement and fall prevention.

Occupational Therapy (OT)

Helps patients regain independence in daily activities such as bathing, dressing, grooming, and self-care.

Speech Therapy (ST)

Improves speech, communication, cognitive skills, and swallowing abilities to enhance safety and quality of life.

Social services

Our social services help locate financial resources and community assistance, including home meal delivery and support groups.

EVERYDAY SUPPORT

Home health aides

Caring, trained, certified home health aides assist with bathing, grooming, incontinence care, light housekeeping and activities of daily living.

Coordinated care.

Direct collaboration with physicians, hospitals, and rehabilitation facilities to deliver seamless, coordinated care tailored to individual patient needs.

Getting started

01 **Tell us what you need.**

Call our Antelope Valley office to discuss home health services and your care needs.

02 **Bring care together.**

Our team coordinates with your physician and care providers. Home rehabilitation requires medical necessity and a physician's order.

03 **Arrange your visits.**

Home visits are planned around your needs.
